

Subjects

Maintenance of atmospheric storage tanks at Statoil

The new oil market order

Lifetime extension
- A change of habits

Advanced surface and materials characterization

Fitness-for-service evaluation of hydrotest exemption

Management of functional safety

CUI, practical approach from a coating perspective

CE marking of attached steel components on storage tanks

The 10th Tank & Refinery Conference

7 December 2017

Veltec Industrial Services A/S and FORCE Technology are proud to invite you to the 10th International Tank & Refinery Conference in Copenhagen. The conference is about new developments and trends in safe and economical operation of oil refining, storage and distribution facilities and we have included an exhibition with demonstrations from various suppliers.

The primary aim of the conference is to create a forum for refinery and storage tank specialists from Scandinavia and the rest of Europe for exchange of information and networking. The conference will thus provide delegates with state of the art knowledge in key areas of interest as well as an opportunity to discuss specific matters with colleagues.

Programme

- 08:30 - 09:00** **Registration**
- 09:00 - 09:15** **Welcome and introduction to the conference**
by Ulf Larsen, Vice President, FORCE Technology and Gert Nielsen, CEO, Veltec Industrial Services A/S
- 09:15 - 09:45** **Maintenance of atmospheric storage tanks at Statoil's refinery in Kalundborg, Denmark**
by Andrew King, Principal Engineer, Statoil Refining Denmark A/S
- 09:45 - 10:15** **The new oil market order**
by Jens Nærvig Pedersen, Senior Commodities Analyst, Danske Bank
- 10:15 - 10:45** **Coffee/Tea break and exhibition**
- 10:45 - 11:15** **Lifetime extension - A change of habits**
by Jacco F. Rosendaal, Managing Director, Inventure Technologies B.V.
- 11:15 - 11:45** **Advanced surface and materials characterization**
by Thomas Fich Pedersen, Specialist, FORCE Technology
- 11:45 - 12:15** **Fitness-for-service evaluation of hydrotest exemption**
by Mads Holm, Specialist, FORCE Technology
- 12:15 - 13:15** **Lunch**
- 13:15 - 13:45** **SESSION 1**
Topic A: Fundamentals on flame arresters and venting standards
by Simon Maier, Regional Manager Europe, Braunschweiger Flammenfilter GmbH
Topic B: CUI, practical approach from a coating perspective
by Chris Magel, Business Development Manager, PPG Protective & Marine Coatings
- 13:45 - 14:00** **Short break and exhibition**
- 14:00 - 14:30** **SESSION 2**
Topic A: Management of functional safety / SIL in process industries during operational phase
by Baris Arslan, Managing Director, ORS Consulting AB
Topic B: Industrial coating systems with long service life
by Claus Erik Weinell, Senior Consultant, Technical University of Denmark
- 14:30 - 15:00** **Coffee/Tea break and exhibition**
- 15:00 - 15:30** **SESSION 3**
Topic A: Scenarios and experience of replacing existing storage tank bottoms
by Hans Svensgaard, Business Development and Marketing Manager, Veltec Industrial Services A/S
Topic B: Better decision making with modern Magnetic Flux Leakage tank floor scanners
by Andrew Simpson, Technical Sales Engineer, Silverwing - Part of Eddyfi Technologies
- 15:30 - 15:45** **Short break and exhibition**

- 15:45 - 16:15** **SESSION 4**
Topic A: CE marking of attached steel components on storage tanks
by Peter Krabbe-Christensen, Project Manager, FORCE Technology
Topic B: Early warning - Leak detection and next generation fuel pipe - safe pipe
by Sverre Holte, Founder, AVA Systems AS
- 16:15 - 16:35** **Coffee/Tea break and exhibition**
- 16:35 - 17:05** **SESSION 5**
Topic A: Cold-work pipe joints: The future has arrived
by Ken Hickling, Managing Director, Bonlok International Ltd
Topic B: Piping inspection and condition-monitoring program
by Mehmet Tamer, Project Manager, FORCE Technology
- 17:10 - 17:40** **Integrity management and risk based inspection of facilities**
by Marianne Videm, Principal Engineer, FORCE Technology Norway
- 17:40 - 18:00** **Closing**
by Peter Bo Mortensen, Vice President, FORCE Technology
- 18:00 - 18:30** **Get-together**
- 18:30** **Conference Dinner**

Registration

Please register online at www.tankref.com. You can also scan the QR-code below. Please notice that registration is binding.

Time and place

7 December 2017.

Scandic Copenhagen Hotel, Vester Søgade 6, 1601 Copenhagen V, Denmark.

The hotel is right in the centre of Copenhagen, conveniently located with easy access to the Central Station and Copenhagen Airport.

Deadline for registration

6 November 2017 at 23.59.

Price

EUR 595.00 exclusive of VAT inclusive of participation in the conference, lunch, get-together and conference dinner but exclusive of accomodation.

Hotel accomodation for nights before and after the conference can be arranged via the Scandic Copenhagen Hotel at www.scandichotels.com/copenhagen. Accomodation (single room) can be booked at a rate of DKK 1,145.00 per night including breakfast. (Use booking code: FORD61217)

Veltec Industrial Services A/S

Veltec Industrial Services A/S has been working with the construction and maintenance of refineries, power plants and other types of industrial plants since 1969.

Veltec has developed its competences within areas like welding and mobile machining. Therefore, we are among the preferred partners for execution of service tasks (turn-arounds and revisions) at refineries, power stations, etc.

Services:

- Welding in all commonly used materials in the process industry
- Safety valve service, testing and certification - on site test equipment available
- Construction and repair of storage tanks
- Maintenance tasks on mechanical equipment
- Turn-arounds, revision
- Leak sealing
- Re-tubing of heat exchangers, coolers, condensers, etc.
- On-site machining of packing surfaces on flanges with diameters between 50 mm and 2000 mm.

FORCE Technology

FORCE Technology is a leading technology, consulting and service company on the international market. We provide our expertise and services to virtually all parts of society, but in particular to the manufacturing, construction and petrochemical industries as well as the energy, offshore, maritime and pharmaceutical sectors.

Business areas:

- Production and process optimisation
- Materials: Corrosion, protection and analysis
- Integrity management
- Inspection, testing, calibration, verification and certification
- Utilisation and development of management systems
- Maritime technology
- Energy and environmental techniques.
